Erythritol 30-60mesh Specification

Erythritol is flavor profile is very similar to sugar, with approximately 70% of the sweetening power of sugar. It is non-cariogenic and has the highest digestive tolerance of the polyols. Since it is natural, it doesn't cause any side effects and tastes almost exactly like sugar without the calories.

Erythritol is primarily used in chewing gums, baked foods and beverages, as well as occurring in fruits such as pear, watermelon and grapes. Sugar alcohols differ from artificial sweeteners because they are exist naturally through plants.
