Benzoic Acid Specification

Benzoic Acid is a colorless crystalline solid and the simplest aromatic carboxylic acid. It is derived from the gum benzoin, which was for a long time the only source for Benzoic Acid. Its salts are used as a food preservative and Benzoic Acid is an important precursor for the synthesis of many other organic substances. The salts and esters of Benzoic Acid are known as benzoates. This product is often used in fruit juices, sparkling drinks, soft drinks, and pickles.
