Menadione Sodium Bisulfite, MSB98 Specification

Menadione sodium bisulfite also called vitamin K3, a fat soluble vitamin. Menadione sodium bisulfite complex aids in blood clotting.

Menadione sodium bisulfite (MSB) is essential for the life of animals, which takes participation in the synthesis of hepatic prothrombin in the liver, takes a unique hemostatic effect and simultaneously prevents the animals from the weakness and subcutaneous hemorrhage.

Applied before the debarking of chick, Menadione sodium bisulfite can reduce the bleeding; accelerate the recovery of wound and promote the growth. It can relieve or even avoid the toxicity reaction when taking with Sulfa Drugs; It also enhances diseases prevention by taking with anti-coccidian drug, white diarrhea and Fowl Cholera. With stress factors, the application of MSB can relieve or even remove the stressful condition of animals while improving the effect of feed.
