Fructo-oligosaccharides Specification

FOS-95 (**Fructo-oligosaccharides**) is a highly concentrated, non-GMO, prebiotic, completely soluble dietary fiber consisting of polymers of fructose anchored by a single glucose, DP<10 (avg. DP ~ 4). It is derived from non-GMO cane sugar via natural enzymatic conversion, and is found naturally in chicory, yacon, dahlia, and Jerusalem artichoke. FOS-95 can be used in bars, beverages, cereals, baked goods, and confectionery applications.

CAS No.	308066-66-2
Packaging	25kg
Place of origin	China
Certificate	Haccp, Kosher, Hala, ISO
Payment terms:	T/T or L/C
Port of dispatch	Shanghai, Tianjin, Qindao
Applications	Fructooligosaccharide, also known as oligofructose, is a colorless to straw yellow powder that is extracted from fruits and vegetables such as bananas, onions, chicory root, garlic, asparagus, barley, wheat, jicama, and leeks. This product is a soluble dietary fiber, long-term use can reduce serum cholesterol, improve lipid metabolism, prevent tooth decay, and cardiovascular disease, etc. Fructooligosaccharide is used in the food and beverage industry as a sweetener.

Fructo-oligosaccharides (FOS) Food Grade

	PRODUCT SPECIFICATION	Rev. No.	03-201807
	Fructo-oligosaccharides	Page	2/2

PARAMETER	SPECIFICATION
Appearance	Colourless or straw yellow powder
Purity	90% or 95% Min
Moisture	6.0% Max
Ash	0.4% Max
Heavy metal	
Arsenic content	0.3ppm Max
Lead content	0.5ppm Max
Microbiology	
Total Bacterial	1000cfu /g Max
E. coli	30cfu/100g Max
Yeast	25cfu/10g Max
Mould	15cfu/10g Max
Pathogen	Negative

We're Food grade Fructo-oligosaccharides **Manufacturers, Suppliers and Wholesalers** in China. Based on our 15 years in food additives & ingredients market, we have a knowledge of China market and manufacturers. We can help our abroad customers save time selecting good manufacturers and update the current market in China.
